

Integration URKUND in Moodle

Integration with Moodle

URKUND, the world's most precise anti-plagiarism solution, is available in Moodle, the world's foremost open source LMS/VLE. The integration was developed and is maintained by Dan Marsden at Catalyst NZ, the originator of the Moodle plagiarism core.

The plugin is available for download at https://moodle.org/plugins/view.php?plugin=plagiarism_orkund and is very easily set up by any Moodle administrator.

A screenshot of a Moodle administrator interface. It shows a checkbox labeled "Enable plagiarism plugins" with the text "enableplagiarism" below it. To the right of the checkbox is the text "Default: No". Below the checkbox is a tooltip that reads "This will allow administrators to configure plagiarism plugins (if installed)".

Enable plagiarism plugins Default: No
enableplagiarism
This will allow administrators to configure plagiarism plugins (if installed)

Welcome to contact us at
information@urkund.com for further information!

Integration URKUND

An URKUND subscription is required and URKUND needs to be contacted at information@urkund.com to activate the integration server side.

More information is available at:
